**TRACK RECORDS
UNITED STATES CROP PRODUCTION**

PREFACE

These track records of United States Crop Production were assembled to serve as a ready reference for data users. The track records are comprised of National level statistics for the principal crops in NASS' estimating program.

The following data, as applicable, are presented for each of the crops:

Historic estimates of acreage, yield, production, price, and value.

Comparisons of preliminary and final planted and harvested acreage estimates.

Comparisons of production forecasts versus end-of-year and final production estimates.

Commodity estimates for 2008 are not considered final until the next historical revision; therefore, the column titled '% of final' are a percent of the estimate published in the annual summary or the latest revision for 2008.

The crop estimating program reports on farmers' planting intentions, estimates of acreage actually planted and expected to be harvested, and forecasts of yield and production during the growing season. After the crops have been harvested, estimates of harvested acreage, yield, and production are made.

Through the mid-year and other quarterly probability surveys, information is collected on acreage, yield, production, and grain stocks on farms. Surveys conducted between quarters are used to gather information on crop conditions and yields.

- 1/ Acreage in cultivation July 1 prior to 1944.
- 2/ Production figures are in 480-pound net weight bales from 1969 to date; prior to 1969, in 500-pound gross weight bales.
- 3/ Gross weight price, including bagging and ties, except that, beginning 1922, American Egyptian cotton is included at net weight; prior to 1908 prices are as of Dec. 1. Season average price is derived.
- 4/ Price and value of production is preliminary, based on marketings and monthly prices received from Aug. 1, 2008-Dec. 31, 2008.

| 2008 | 7,415 | 89.5 | 7,271 | 87.8 | 7,301 | 88.1 | 8,284 | | | | |

1/ April 1976-1980; February 1982-1985.

2/ July Prior to 1975.

3/ Additional survey done late April 1983 because of PIK program. (12,010,000 planted acres - 101.1% of final)

1/ Price and value exclude type 61 to avoid disclosure of individual operations.
2/ Price and value exclude type 41 to avoid disclosure of individual operations.
3/ Price and value exclude type 32 to avoid disclosure of individual operations.
4/ Includes estimated value of production for CT and MA type 61 in 2008.
Used 2007 CT and MA type 61 price to compute the the 2008 value of production.
Price and value exclude type 32 to avoid disclosure of individual operations.
